

Fabric Care Guide

Rooted in a deep dedication to the tenets of upholstery, Wendelbo offers a wide collection of fabrics. From deep heavyweight bouclé to flat-woven cotton fabrics, our own curated collection of textiles has been carefully edited to offer a wide range of textures, colours, and qualities that complement each other while elegantly accentuating the handcrafted details of our collection of upholstered pieces.

From unicoloured staples down to intriguing tone-in-tone and speckled surfaces, the colour scheme of our collection is comprised of subtle and earthy, subdued hues finessed to fit in while standing out.

CARE AND MAINTENANCE

Upholstered furniture needs care and maintenance to ensure a long-lasting appeal and hand feel, year after year. Where designs with fixed covers require the least maintenance, designs with loose covers require frequent to regular maintenance to keep their shape and character.

We always recommend that you follow the guidelines below to take care of your upholstered furniture.

Regular maintenance

- 3-4 times a month, remove dust by using a soft brush and/or vacuum with a soft mouthpiece at a soft to medium suction.
- Loose seat- and back cushions, or filling with down and feathers, should be patted down regularly to maintain their shape. This should be done after removing the cushions from the structure for improved air circulation.
- Cushions and scatters should be shaken and fluffed up regularly to maintain their shape.

Stain removal

- We recommend consulting with a specialist when removing stains.
- When cleaning a spill, use a solution of warm water and mild soap and gently dab the spill with a damp cloth. Finish by drying with an absorbent towel. Avoid rubbing the fabric too hard when cleaning spills, as this will only spread the spill and cause damage to material and colouring alike.
- Never leave the fabric soaked. A hairdryer can be useful to dry any wet areas. However, please be careful not to heat the fabric up too much as this can cause discolouration.
- Always wipe up any liquid spilt onto the fabric immediately, as marks or stains allowed to penetrate the fabric may leave permanent stains.
- Never use cleaning with bleach, ammonium or similar.

Chenille and Velvets

Our collection of fabrics includes a few velvet (Juke and Senza) and chenille fabrics (Comfort, Lana, Navona and Roco) on which natural pressure marks might occur.

- Most folds or pressure marks can be reduced or removed by using a clean damp cloth or a soft brush.
- For cotton velvet, steaming can likewise be helpful to reduce pressure marks.
