

Milton Floor Lamp

ASSEMBLY INSTRUCTIONS

THE SAFETY OF THIS FIXTURE IS ONLY GUARANTEED IF THE FOLLOWING INSTRUCTIONS HAVE BEEN OBSERVED.

KEEP ALL PACKAGING MATERIALS UNTIL YOU HAVE VERIFIED ALL COMPONENTS AND PARTS

Be sure the lamp is unplugged while assembling or when replacing the bulb.

1. Set the base of the lamp on the ground and attach the stem with the light socket to the stem of the base until they are secure.
2. Attach the lampshade to the stem by setting the metal ring, found inside the lampshade, over the lightbulb socket and secure it in place with the provided plastic nut.
3. Install a lightbulb into the socket. Bulb wattage should not exceed 60W or the LED equivalent. We recommend wrapping excess cord around the hook for organized cord management. This lamp is for indoor use only.
